The Changing Picture of Health in Cambodia

Indicators	CDHS 2000	CDHS 2005	CDHS 2010
<5 Mortality Rate (per 1,000 live births)	124	83	54
Infant Mortality Rate (per 1,000 live births)	95	65	45
Fertility : Total Fertility Rate	4	3.5	3.0
Contraceptive Prevalence Rate	19%	27%	31.4%
Ante-natal care visits	32%	69%	89%
Delivery by skilled provider	32.8%	43.8%	71%
Delivery at health facility	10%	21.5%	54%
Maternal Mortality Ratio (per 100,000 live births)	437	472	206
Underweight	Earlier data not comparable	28%	28%
Anemia (women 15-49 years)	58%	47%	44.4%
Exclusive Breastfeeding	10%	60%	74%
Households with Iodized Salt	14%	73%	82.7%
Fully immunized (12-23 months)	40%	66.6%	79%

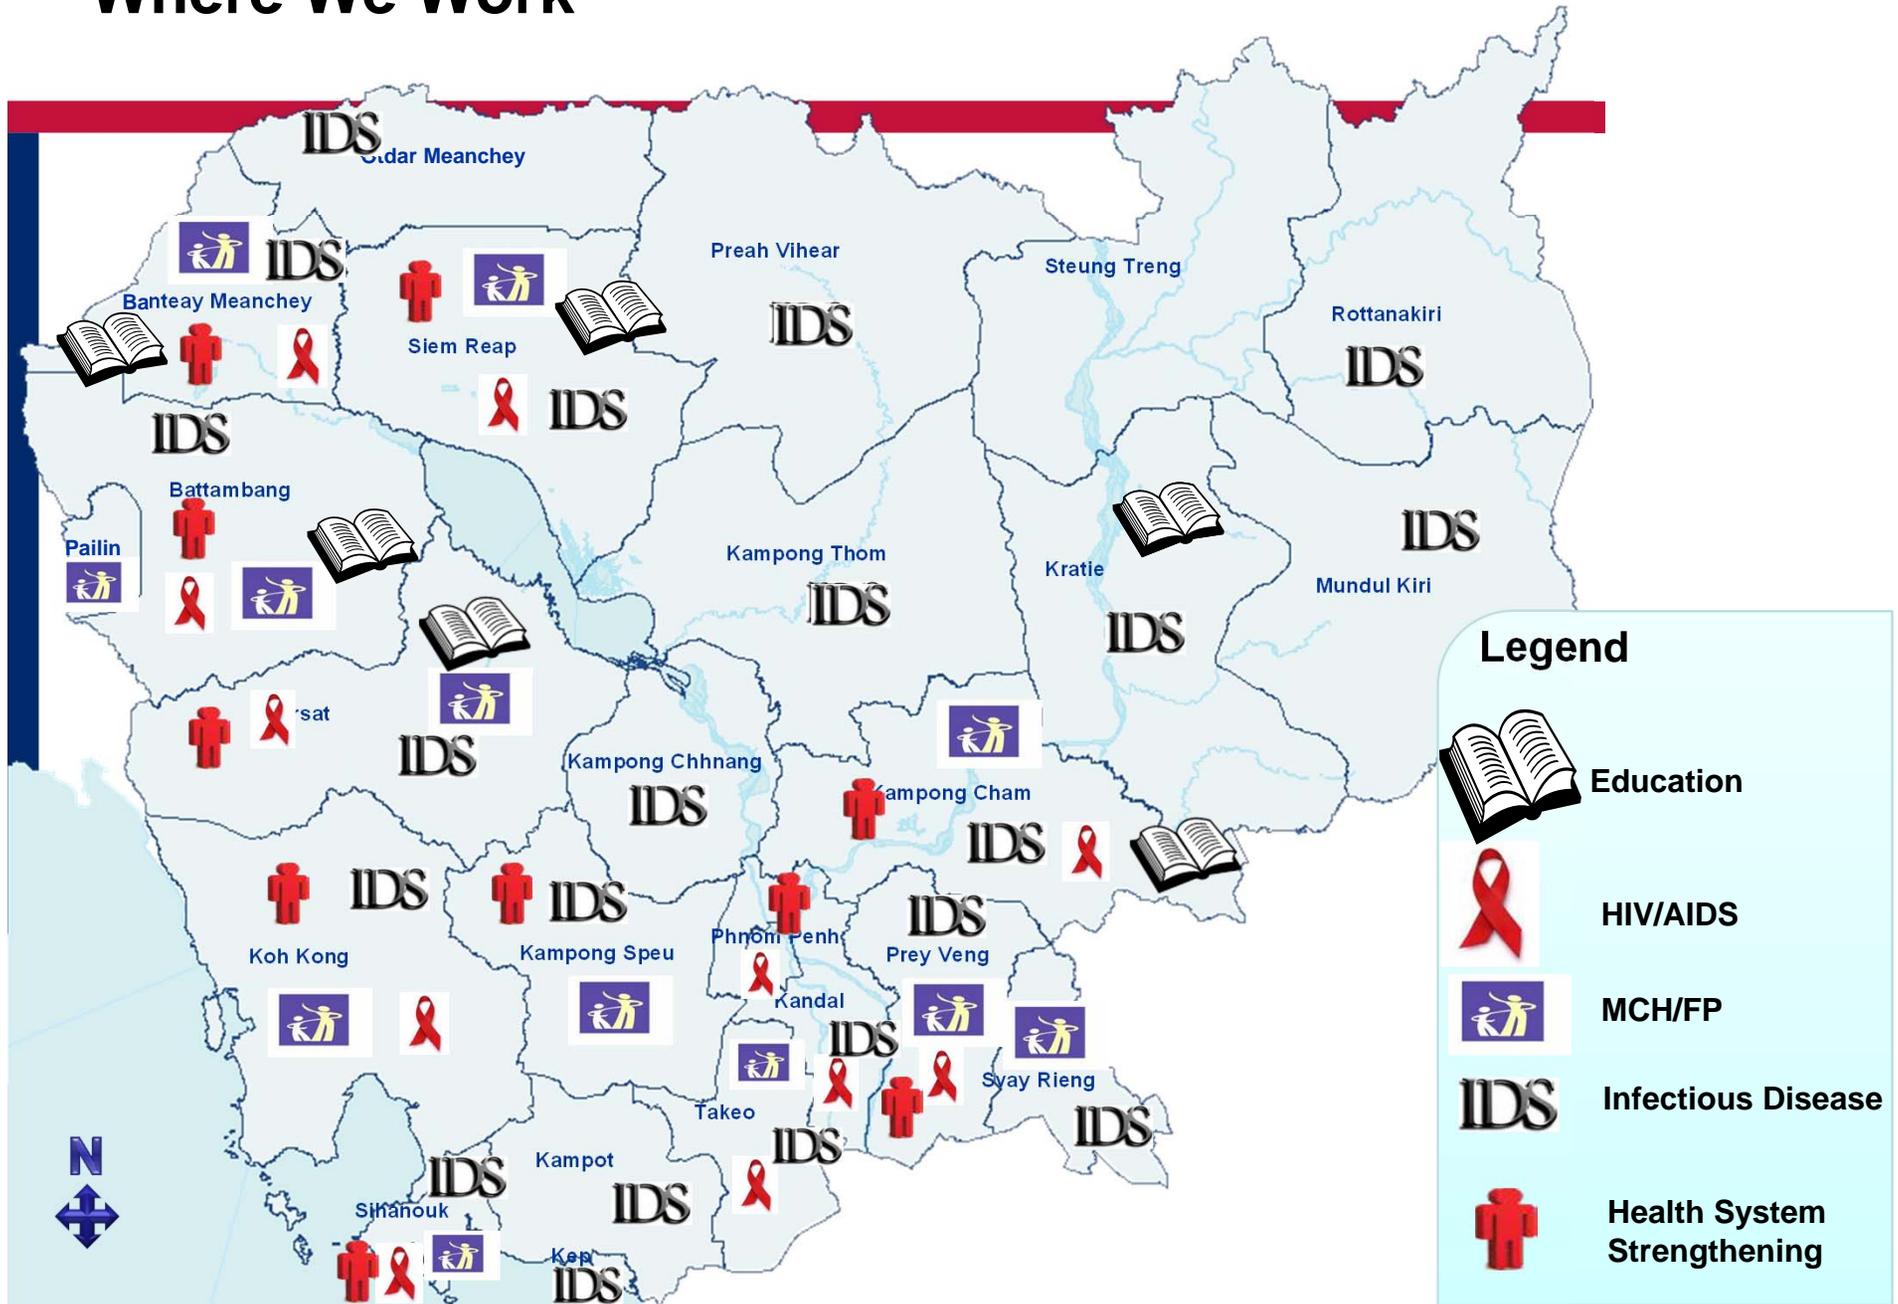

Strategic Framework for Health & Education

Current partners and resource distribution

Where We Work

Maternal and Child Health

MCH

- Promote key MCH health interventions in facilities and in the community
- Diarrhea and ARI control and treatment
- Immunization
- Improve access to quality services
- Support training, coaching, and supervision
- Working through VHSG “Commune Councils”

Nutrition

- Micronutrient supplementation
- Food fortification
- Infant and young child feeding
- Water and sanitation

Family Planning

- Family planning service provision
- Social marketing of RH/MCH commodities

Infectious Diseases

Tuberculosis

- Improve access to quality TB diagnosis and treatment through community-based and private sector networks
- Increase access to HIV testing and care among TB patients
- Improve multi-drug resistant TB case management
- Improve TB diagnosis capacity at national and provincial levels
- Improve infection control

Malaria (with central and regional programs)

- Improve access to early diagnosis and treatment
- Improve prevention behaviors among people living in malaria zones

Other Infectious Diseases

- Strengthen animal and human surveillance and response
- Pandemic preparedness and planning

Health System Strengthening

Health financing

- Reduce financial barriers to health services among the poor through Health Equity Fund (HEF) and community-based health insurance schemes

Service quality improvement

- Strengthen managerial and technical capacity of hospital and health center staff
- Improve facility-based infection control
- Strengthen referral systems
- Improve private sector licensing and regulation

Information systems

- Support development of integrated web-based health information systems
- Promote data analysis and use

Drug quality monitoring

- Improve national and provincial capacity in testing for counterfeit and sub-standard drugs
- Increase public awareness

HIV/AIDS

- Peer education among most-at-risk populations
 - Sex workers (Entertainment Workers)
 - Men who have sex with men (MSM)
 - Drug users
 - Clients of sex workers
- Condom social marketing
- HIV counseling and testing
- Community- and clinic-based care
 - Home care and referrals
 - Care for orphans and vulnerable children
 - Opportunistic infections and treatment (ART)
- Prevention of mother-to-child transmission
- Tuberculosis and HIV co-infection
- Surveillance and “strategic information” for planning
- Laboratory support and blood safety

Education

Increased Relevance, Quality, and Access in Education

Scope

- 5-year, \$10 million project
- Primary/lower secondary schools
- 3 provinces
- Cross cutting themes -- gender, poverty, partnerships

Technical Approach

- Scholarships
- School improvement grants
- Relevant lower secondary life skills curriculum
- Teacher training
- School management training
- Local civil society and government capacity development

Thank you!
